5.3. ADVICE FOR FIREFIGHTERS:

Contact emergency personnel. Use self-contained breathing apparatus and full protective gear, if large quantities of product are involved. Hazardous decomposition products may be released. Thermal degradation may produce oxides of carbon, and phosphorus and/or derivatives.

5.4. ADDITIONAL INFORMATION:

Move undamaged containers from immediate hazard area if it can be done safely.

SECTION 6: Accidental release measures

6.1. PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT AND EMERGENCY PROCEDURES: PERSONAL PRECAUTIONS:

Ensure adequate ventilation. Keep people away from and upwind of spill/leak. Avoid inhalation, ingestion and contact with skin and eyes. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Ensure clean-up is conducted by trained personnel only. Refer to protective measures listed in sections 7 and 8. Wear personal protection equipment (see section 8).

6.2. ENVIRONMENTAL PRECAUTIONS:

Do not allow contact with soil, surface or ground water.

MEASURES:

Effective exhaust ventilation system. Maintain air concentrations below occupational exposure standards. Avoid contact with the eyes, hair, skin. Provide skin and eyes protection plan. Handle in accordance with good industrial hygiene and safety practice. Remove and wash contaminated clothing before re-use. Wash face, hands and any exposed skin thoroughly after handling. Provide suitable facilities for quick drenching or flushing of the eyes and body in case of contact or splash hazard. An eyewash and/or safety shower must be required where an employee's eyes or body could be exposed to injurious corrosive materials.

RESPIRATORY PROTECTION:

When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. A respiratory protection program that meets OSHA's 29 CFR 1910.134 and ANSI Z88.2 requirements or European Standard EN 149 must be followed whenever workplace conditions warrant respirator use. In an emergency (e.g.: unintentional release of the substance) respiratory protection must be worn. Consider the maximum period for wear. At present time there is no available information about suitable filter respirator. A self-contained breathing apparatus can be used in any case.

BODY PROTECTION:

Protective clothing with PVC apron, acid resistant boots, PVC boots.

EYE PROTECTION:

Safety chemical resistant goggles or face shield. Eye wash bottles or eye wash stations in compliance with applicable standards.

PROTECTION OF HANDS:

Chemical protective gloves according to DIN EN 374 with CE-labelling. Impervious gloves. Check the condition of protective gloves after each use for any damages like holes, cuts or tears. Do not wear protective gloves longer than necessary. After use of gloves apply skin-cleaning agents and skin cosmetics.

- material of gloves:

PVC, Neoprene, Natural Rubber, butyl-rubber, nitrile rubber, fluoro-carbon rubber.

- gloves made of the following materials are not suitable:

Gloves for mechanical protection, textile and leather gloves do not provide protection against chemicals.

RISK MANAGEMENT MEASURES:

The operators shall be instructed adequately. The workplace shall be inspected regularly by competent personnel e.g. the safety representative. (Workers under the age of 18 are not allowed to work with phosphoric acid. Expectant and nursing mothers cannot be designated to work with this substance).

ASSESSMENT BIODEGRADATION AND ELIMINATION: Readily biodegradable (acc. to OECD criteria).

The surfactants contained in this preparation comply with the biodegradability criteria as laid down in Regulation (EC) No.648/2004 on detergents. Data to support this assertion are held at the disposal of the competent authorities of the Member States and will be made available to them, at their direct request or at the request of a detergent manufacturer.

Ingredient	Biodegradability	Days (OECD Guideline 301 B; 301 D and 302 B)
Phosphoric Acid	The study does not need to be conducted because the substance is inorganic. (Biodegradability term pertains to an organic material capable of decomposition as a result of attack by microorganisms). However, phosphoric acid will be neutralized by bases present in natural environment)	-
